**Chapter 1 by Monorilakkuma**

CONFIDENTIAL ENTRY 1

MARCH 1997

----

I am Doctor, today I will be performing an experiment. The experiment is to be done on a chosen subject from the human pound. The proof to show the world that my technique is what one day that will save all! The nurse gave me the details of the subject that we are going to use on.

SUBJECT 56#

Name : Henrick Milterford

Age: 34

Race: Caucasian

Last updated: 2020-08-05

Disease: None

Yes, this subject is perfect! I will have the nurse record everything that is done during the surgery tryouts!

I will not fail! I will prove it to everyone and all the other doctors! I am worth of becoming a legend! Yes...A legend.

## DURING SURGERY RECORDING:

The camera is set--

The nurse prepared all the instruments needed.

The subject is awakening slowly.

The subject is now struggling and scared.

The subject is confused where its current location and situation.

The lab assistant ( nurse ) is called to prepare the anaesthetic.

The liquid is soon inserted into the subject.

## THE PROCEDURE IS NOW STARTING--

It seems that SUBJECT 56# has an injury on his torso area, and it is a fresh injury as well.

I asked my assistant of what had caused it. She told me that he had fought the wardens when he was picked.

I was told that SUBJECT 56# feared of dying. That it did not want to die just yet.

A little fighter, ain't it?

What matters now is that I could enter SUBJECT 56#'s torso easily.

The injury is deep in and did not heal completely.

SUBJECT 56# is stirring in its sleep.

See more of Story Wars

I told the nurse to get him ready.

The liquid is now in place.

The subject is knocked off immediately after the liquid is injected.

The injury is not cut wide open.

The arrangements of the human organ can be thoroughly seen.

There is a minor injury //scratch// next to the heart.

Then it means that SUBJECT 56# could have died from this injury.

SUBJECT 56#'s organ are slowly taken out.

They have been recorded.

It seems that SUBJECT 56# is losing blood.

I told the nurse to take an A+ blood pack.

The condition is now stabilized again.

I searched for space around the torso.

In order to put this chip in them.

The chip is to ensure that there is no injury in the body of a human.

The nurse gave me the operating scissors to cut through a little bit.

The blood spurted out onto my face.

The nurse has wiped off the blood.

I sewed the chip close to the heart.

I made sure the chip is well functioning.

I don't want this to fail now.

The human organ is now all put back into their original places.

I made sure none of them are damaged (who lives with damaged organs?).

I sewed back SUBJECT 56#'s torso.

THE PROCEDURE IS FINISHED.

AFTER PROCEDURE RECORDING--

I seem that SUBJECT 56# is

As soon as the subject is back to normal, I will do a report on all of this.

I need to record all of this.

I will do a report on all of this as well.

That is all for now and today. I am hoping the subject recovers quickly.

FINISHED PROCEDURE RECORDING.
